SUMMARY

Final-year Diploma in Information Technology (NQF Level 6) student currently completing a 6-month in-service training internship in Software and Systems Development.

Experienced in developing data-driven dashboards, web applications, and automated systems that support business operations and digital transformation. Skilled in Python, JavaScript, React, SQL, and C#, with hands-on experience in API integration, system deployment, and automation.

Proven ability to build scalable solutions including KPI dashboards, document automation systems, and digital learning platforms. Strong analytical and problem-solving skills with a focus on improving system efficiency and user experience.

EDUCATION

Diploma in Information Technology (NQF Level 6)
Belgium Campus iTversity – Kempton Park, Gauteng
2023 – Present

- Final-year student
- Specialised in:
    - Web Development
    - Programming
- Completed IoT-based Smart Door Alert System project

National Senior Certificate (Matric)
Hope Fountain Combined School
Completed: 2022

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, C#, SQL
- Web Development: React, HTML, CSS
- Data & Reporting: Streamlit, KPI Dashboards, Data Processing
- API & Integration: REST APIs, Postman, WhatsApp Integration
- Automation: Document automation scripting (dynamic tag replacement)
- Database Management: SQL, Data Integration
- Tools & Version Control: Git, GitHub
- Deployment & Hosting: DNS Configuration (Hetzner, Domains.co.za), Web Hosting
- Other Tools: Synchroteam, Figma, Microsoft Office

PROFESSIONAL EXPERIENCE

IT Intern – Software & Systems Development
CVTS (In-Service Training) | 2025 – Present

- Developed KPI-driven dashboards using Python and Streamlit to support business reporting and decision-making
- Designed reusable dashboard frameworks adaptable across multiple organisations

- Built and maintained web applications using React, HTML, and CSS
- Implemented WhatsApp API integrations for automated business communication workflows
- Developed automation scripts to generate structured documents by dynamically replacing predefined tags with real-time data
- Configured DNS records and managed deployment using Hetzner and Domains.co.za
- Developed SCORM-compliant learning modules for digital education platforms
- Worked with Synchroteam for job scheduling, workflow automation, and system coordination
- Collaborated in stakeholder meetings and agile planning sessions
- Managed version control using Git and GitHub

PROJECTS

Web Development Projects

- Geo Minerals Website (HTML, CSS)
  Live: https://geominerals.co.za
- Mineral Exco Website (HTML, CSS)
  Live: https://mineralexco.co.za
- Ashra Investment Holdings (HTML, CSS)
  Live: https://ashra.co.za

Executive Business Reporting Dashboard (Python, Streamlit)

- Developed a data-driven dashboard for KPI tracking and performance analysis
- Integrated multiple datasets (jobs, employees, sites)
- Implemented secure authentication and reusable architecture

Document Automation System (Python)

- Developed automation scripts to generate documents by dynamically replacing predefined tags with real-time data.
- Improved efficiency by reducing manual document creation processes.
- Designed reusable templates for scalable document generation

WhatsApp API Integration (Meta & Twilio)

- Implemented WhatsApp API integrations using Meta sandbox and Twilio for automated messaging workflow.
- Developed and tested interactive message flows for user engagement and system responses.
- Configured and validated communication processes using test environments

ImfundoHub Learning Management System (In Development)

- Developing a digital learning platform with structured access to academic content.
- Implementing user authentication and role-based access control.
- Designing a centralized system for managing and delivering educational materials

Smart Door Alert System (IoT Project)

- Designed an alert system for deaf users using motion and safety sensors
- Implemented real-time alert mechanisms (visual and vibration-based)

LANGUAGES

- English (Fluent)
- isiZulu (Fluent)
- isiXhosa (Intermediate)
- Sepedi (Intermediate)
